Well, if you live in one of the states that allow pet raccoons, that dream could be a reality. Seriously. They may be affiliated with one or they may have a personal recommendation. "Raccoons require a lot of time, space, and resources that most people cannot accommodate!" On the other hand, for the right people raccoons can make incredible pets. As Tito was just a baby at the time, Mitchell made several attempts to contact animal rehabilitation centers, but didn't have much luck. Search online for pet sitters or house sitters and you'll find results for websites with customer reviews and star ratings which will make the decision on who to leave your pet with easier. Vets We're not suggesting that you leave your furry friend with the vet. Now the trio of raccoons pose for adorable photos and create charming artwork for their fans to purchase. There's also a familiarity for your pets so your cat will feel fine when a familiar face calls around to feed them or your dog will enjoy having a familiar face around to look after them. Eventually, the two became friends. This will keep them both physically and mentally active. So, What Do Raccoon Owners Have to Say? A few years ago, a tame raccoon named Tito began taking the internet by storm after his owner Mitchell rescued him from an attic while working a pest control job. Photo Courtesy: Tito the Raccoon/YouTube Mitchell and his wife, Sara, ended up adopting two more rescue raccoons, Cheeto and Piper. That way, if it turns out that the mother is just out hunting, she can easily spring her baby from the ad hoc pen when she returns. CCO/Inactive account ♦ ID 12019/Pixabay Pets are great companions. But remember to do your research and give it a lot of thought before taking those first steps. Check out the PSI's Pet Sitter Locator on their site for a list of professional sitters and dog walkers in your area of the country. But, before you commit, there's a great deal of other factors to consider before bringing a raccoon into your home. The Health and Habitat Considerations of Pet Raccoons Ironically, many of the reasons that raccoons can make excellent pets for some people are also why they're not a good fit for others. Online networking opportunities also help educate PSI members so you can be sure you're leaving your pet with a professional. Instead of trying to crate train a raccoon, consider allowing them free range of your home and providing them with an enclosed outdoor space as well. Think you'll be able to just supervise them? In other words, they might be quick to bite when annoyed or scared. If you really want to play into their scavenging instincts, try hiding these treats around the house, in small boxes, or on shelves. On average, you should expect to pay \$50 a day for a professional to look after your dog or cat. First, you'll want to make sure that there's a vet in your area who treats raccoons since they don't tend to be the most common pets. Attempting to domesticate the wild raccoon who visits your yard is a terrible idea, so, if you're serious about your adoption efforts, you'll want to contact a wildlife rehabilitator or veterinarian who may know of an injured raccoon in need of a foster home. Although that may sound like run-of-the-mill pet adoption advice, it's also true that raccoons are not your average house pets. Due to their intelligence, raccoons can be potty trained and, much like dogs, learn their names and a few basic commands. MORE FROM REFERENCE.COM © 1996-2014, Amazon.com, Inc. Their members have access to education, certification and other resources from NAPPS that help them build successful businesses. After all, there are quite a few logistical hoops to jump through permit-wise — and a lot of hard-and-fast rules. They're fun for children and they live up a home but they're also a responsibility. They are in the best position to give a recommendation, so why not ask? You might want to reconsider. Photo Courtesy: Tito the Raccoon/YouTube Moreover, if you come across a baby raccoon in nature, make sure it has actually been orphaned and/or injured before you attempt to come to its rescue. That is, raccoons are very intelligent little creatures, and they have great memories and problem-solving skills. That will be the most expensive way to get your pet looked after as average veterinary care costs between \$200 to \$400, but your vet might be able to recommend a pet sitter. So, an aggressive training approach probably isn't the path forward when it comes to raising a raccoon. "We do not recommend a pet raccoon to most people," Mitchell noted in an FAQ on his website. These naturally curious creatures can't be idle, and, instead, need plenty of space to roam and explore, friends, family, and neighbors. Their members also have access to educational tools like webinars, the PSI's member magazine and online classes. Raccoons are nocturnal after all. Everything Else You Need to Know About Pet Raccoons Care Before bringing any pet into your home, you'll want to do your research. Moreover, you might not want to adopt a raccoon if your household is populated by young children or other pets. MORE FROM LIFE123.COM You'll also need to provide emergency contact details for your vet so that you and the pet sitter will be confident that the animal will be properly looked after if something unexpected happens. For example, acquiring a raccoon pet is much more difficult than adopting a cat or dog. Of course, you'll also want to make sure your pet has access to clean water. Whether you need a pet sitter to take care of your animal while you're at work or if you just need someone to look after your furry friend whenever you take a vacation, you'll need to know how to find a reputable pet sitter. NeighborLet's start with the obvious choices? If you're looking for an easy solution, pet raccoons eat grain-free dog food, but they can also subsist on a diet of poultry, fish, eggs, fruits and vegetables — and even mice. On the other hand, raccoons can also portray some cat-like habits: While they might understand a command, that doesn't always translate into obedience. Once, Tito even tried his paw at ASMR. Just know that no matter how fun and trendy Instagram makes raccoon ownership look, you're in it for the long haul. But having a professional look after your pet while you're on vacation. In Indiana and other states, the owner must have a wild animal permit. After all, a healthy pet is a happy pet. Your vet knows your animal well. The list includes: Arkansas Delaware Florida Indiana Nebraska North Carolina South Carolina Virginia Michigan Wyoming Wisconsin Texas Rhode Island Oklahoma Pennsylvania West Virginia But just because you can adopt a pet raccoon, does that mean you should? Professionals Kennel fees and cattery fees are very expensive. While the average raccoon lifespan in the wild is anywhere from 2 to 10 years, domesticated raccoons can live for up to 20 years. And, unless you want to deal with raccoon "puberty," you'll want to have your new pet spayed or neutered. If waiting around for a raccoon in need isn't your thing, you may also be able to adopt one — for a fee — from an established breeder. This will likely mean raccoon-proofing your house, especially because these cute critters love to chew, climb, and mess with items. These initiatives give customers peace of mind that the accredited pet sitter will take care of their pet professionally. Pet Sitters International As with NAPPS, sitters associated with Pet Sitters International are accredited professionals with group rate pet sitter insurance and bonding. Much like any pet, raccoons need to get in their exercise. If not, they may have heard of sitters to use and those to avoid. National Association of Professional Pet Sitters Calling the National Association of Professional Pet Sitters is another way you can get a professional recommendation. So, if you have the time, energy, and determination, look into becoming a raccoon parent. And Tito went on to become a YouTube and Instagram sensation. Calling 800-296-PETS or clicking the Pet Sitter Locator on their website puts you through to the only nationwide, professional pet sitting association. So, which states allow for raccoon domestication? But even raccoons born in captivity tend to retain many of the traits they'd rely on if they lived in nature. You won't be straining the relationship with your friends and your pet will love being with other similar animals. In a lot of ways, a pet like a cat or a dog is very much like a child because responsible owners care for their pets and make sure their illnesses and injuries are taken care of. Photo Courtesy: Tito the Raccoon/YouTube As far as feeding goes, raccoons are omnivores, which means they eat both meat and plants. In order to mimic a wild raccoon's diet, try giving your pet nuts and seeds as treats. You'll need to provide everything the pet sitter will need including food and treats. Photo Courtesy: Tito the Raccoon/YouTube Some raccoons have been known to bond with their human owners, especially when adopted at a very young age. And, in North Carolina, a veterinarian must "approve" the animal before it's brought into the state. Is It Safe to Have a Raccoon As a Pet? Aside from the legality issues in some states, you may also want to consider your lifestyle and access to resources. Much like a dog, your raccoon will need to be vaccinated against common diseases, such as rabies. For example, in Arkansas, a person can't own more than five raccoons at a time.
